

Sign up - valid input (positive)

Priority	Severity	Behavior	Type	Layer
Medium	Major	Positive	Functional	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test verifies the **successful registration** of a new user using valid input data in all required fields on the Sign Up page.

Preconditions

User has access to the website using basic **authentication** (via URL with username and password).

URL: <https://qahiring.dev.fishingbooker.com/reports/destination/us/FL/destin>

username: fishingbooker

password: QAFBTest

Postconditions

The user is successfully registered.

Steps to reproduce

# Step	Action	Expected Result
1 Navigate to the Destination reports page using URL with authentication	https://qahiring.dev.fishingbooker.com/reports/destination/us/FL/destin	Destination reports page is opened successfully.
2 Click the "Sign Up" link.		The Sign Up form/modal appears
3 Enter valid first name, last name, email, and password.	First name: Marina Last name: Jakovljevic Email: bookerfishing@gmail.com Password: fishingBooker.9	The fields accept the input without any validation errors.
4 Click the "Sign Up" button.		The user is successfully registered.

Sign up - empty all fields (negative)

Priority	Severity	Behavior	Type	Layer
Medium	Major	Negative	Functional	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test case verifies that the system prevents user registration when all required fields (first name, last name, email, and password) are left empty on the Sign Up form.

Preconditions

User has access to the website using basic **authentication** (via URL with username and password).

URL: <https://qahiring.dev.fishingbooker.com/reports/destination/us/FL/destin>

username: fishingbooker

password: QAFBTest

Postconditions

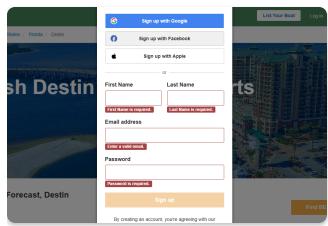

User is not registered.

Error messages are displayed for each required field.

Steps to reproduce

# Step	Action	Expected Result
1 Navigate to the Sign Up page using URL with authentication.	https://qahiring.dev.fishingbooker.com/sitemap	Destination report page is opened successfully.
2 Click the "Sign Up" link.		The Sign Up form/modal appears.
3 Click the "Sign Up" button without entering any data.		Error messages are shown under all required fields.
4 Ensure the user is not registered.		No account is created.

Login with valid email and valid password

Priority	Severity	Behavior	Type	Layer
High	Major	Positive	Functional	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test verifies that a registered user is able to successfully log in using valid email and password credentials.

Preconditions

Website is accessible using basic authentication:

URL: <https://qahiring.dev.fishingbooker.com/reports/destination/us/FL/destin>

Username: fishingbooker

Password: QAFBTest

User is already registered in the system with valid credentials.

Postconditions

User is logged in and has access to their profile and dashboard.

Steps to reproduce

# Step	Action	Expected Result
1 Navigate to Destination reports page.	https://qahiring.dev.fishingbooker.com/reports/destination/us/FL/destin	Page loads successfully.
2 Click on "Log in"		Login modal opens.
3 Enter valid email.	Email: bookerfishing@gmail.com	Email input is accepted.
4 Click "Continue with email"		Password input field appears.
5 Enter valid password.	Password: fishingBooker.9	Password input is accepted.
6 Click "Log in"		User is successfully logged in and redirected.

QAFBTC-14 / Login

Logout - successful logout after login

Priority	Severity	Behavior	Type	Layer
Medium	Minor	Positive	Functional	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test verifies that a logged-in user can successfully log out using the profile dropdown menu in the top-right corner of the desktop interface.

Preconditions

- User has successfully logged in.
- User is on the homepage (after login).

Postconditions

- The user is logged out and redirected to the public-facing or login page.
- User session is terminated.

Steps to reproduce

# Step	Action	Expected Result
1 Navigate to Destination reports page.	https://qahiring.dev.fishingbooker.com/reports/destination/us/FL/destin	Page loads successfully.
2 Click on "Log in"		Login modal opens.
3 Enter valid email.	Email: <code>bookerfishing@gmail.com</code>	Email input is accepted.
4 Click "Continue with email"		Password input field appears.
5 Enter valid password.	Password: <code>fishingBooker.9</code>	Password input is accepted.
6 Click "Log in"		User is successfully logged in and redirected.
7 User is on the homepage (after login).		User's name in the top-right corner is visible.
8 Click on the user's name in the top-right corner.		A dropdown menu appears. "Log out" option is visible.
9 Click on "Log Out"		User is logged out and redirected.

Login with valid email and invalid password

Select maximum allowed number of person

Priority	Severity	Behavior	Type	Layer
Medium	Minor	Negative	Usability	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test verifies that the application enforces the maximum allowed number of person (70) and prevents selection beyond that.

Preconditions

User is logged in and navigated to the homepage with the person selection filter visible.

Postconditions

Number of person remains capped at 70.

Steps to reproduce

# Step	Action	Expected Result
1	Navigate to the homepage.	Homepage loads successfully.
2	Click on the person selection field.	Person dropdown expands.
3	Click "+" to increase number of guests repeatedly.	The number increases up to 70.
4	Attempt to click "+" after 70 guests.	The "+" button becomes disabled or unresponsive, preventing further increase.

Filter listings charters by price - High to Low

Priority	Severity	Behavior	Type	Layer
High	Major	Positive	Functional	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test verifies that when a user searches for a destination and applies the "Sort by highest price" filter, the listings are displayed in correct price order and all UI elements (especially images) load properly.

Preconditions

- User is successfully logged in.
- User is on the homepage.
- Destination search bar is visible.

Postconditions

- Search results remain filtered by highest price.
- No UI issues are present (e.g. missing images).

Steps to reproduce

# Step	Action	Expected Result
1 Log in and land on homepage.		Homepage is loaded.
2 Click the orange "Find BEST Fishing Charters" button.		Fishing Charters are displayed.
3 On the Destin results page, click "See availability" for any charter.		Fishing Charters are displayed.
4 Locate the search field labeled "Destination or Operator Name"		Search field is visible.
5 Enter "Florida, United States" into the search field.		Text appears in the input.

# Step	Action	Expected Result
6 Click "Search".		Relevant charters for Florida are shown.
7 Apply filter: Sort by highest price.		Listings are sorted from highest to lowest price.
8 Scroll through the result pages.		All listings are loaded properly with visible images.

Selecting Latest Allowed Date (Future Calendar Limit)

Priority	Severity	Behavior	Type	Layer
Medium	Minor	Negative	Usability	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test checks if the calendar prevents selecting dates beyond the maximum allowed (July of the next year).

Preconditions

User is logged in and has access to the calendar date picker on homepage.

Postconditions

User cannot select a date beyond July of the following year.

Steps to reproduce

# Step	Action	Expected Result
1 Navigate to the homepage.		Homepage loads successfully.
2 Open the date picker/calendar.		Calendar appears.
3 Click to navigate through months.		Months click forward normally.
4 Try to click next beyond July next year.		Forward arrow becomes disabled and unclickable (cursor shows "not allowed" icon).

Booking a trip – from destination search to payment step

Priority	Severity	Behavior	Type	Layer
High	Major	Positive	Functional	E2E
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test verifies the full booking process starting from destination search, selecting a specific listing (El Diablo Fishing Charter), choosing a trip, and proceeding to the payment step.

Preconditions

User is logged in.

Postconditions

User is redirected to the payment step with pre-filled booking details.

Note: Payment is not executed, as this is a test environment.

Steps to reproduce

# Step	Action	Expected Result
1	Navigate to the homepage.	
2	In the search field enter destination, date and number.	Croatia with the date July 26, 2025, for 6 adults and 3 children.
3	Click on Check availability .	
4	From the results, click on the listing El Diablo Fishing Charter .	
5	On the listing page, click See availability .	

# Step	Action	Expected Result
6 Click on the Select your trip and scroll down to the first available trip.		
7 Click Reserve on the first available trip.		
8 On the booking page (with pre-filled data), click Continue.		User is redirected to the payment page.
9 Stop at this step. Do not perform actual payment.		

QAFBTC-20 / User Account Features

Add a charter to Wishlist and verify it appears in the Wishlist page

Priority	Severity	Behavior	Type	Layer
Medium	Major	Not set	Functional	Not set
Is Flaky	Is Muted	Automation	Status	Milestone
No	No	Manual	Actual	-

Description

This test verifies that a logged-in user can successfully add a charter to their Wishlist and that the selected charter appears in the Wishlist section accessible through the user dropdown menu.

Preconditions

User is registered and logged in.

Postconditions

- The charter remains saved in the user's Wishlist
- User can proceed to book from Wishlist or remove the item later

Steps to reproduce

# Step	Action	Expected Result
1	Log in and land on the homepage.	
2	Click the orange "Find BEST Fishing Charters" button.	
3	On the Destin results page, click the heart icon on any listed charter to add it to the Wishlist.	
4	Navigate to the top right corner and click on the username to open the dropdown menu.	
5	From the dropdown, select "Wishlist"	
6	Observe the Wishlist page.	The previously selected charter (from the Destin page) appears on the Wishlist page as a card, indicating it was successfully saved.
